---

All;

Wanted to let you know that (b) (6) called me about the sewer line for the grey house which I know you guys know about and are working the issue. I am not sure how the sewer runs for both of his properties and I assume that they connect at some point. He thinks its possible that we may have crushed the line with our equipment. Did we ever break a line on the grey house? I thought it was only on the red house. He also mention that the replacement near the alley may be higher than the sewer lines in the yard so that it may not be gravity flowing and causing a backup as well (not sure if you guys checked that when you fixed it). Anyway, please keep me updated as we have to get it fixed.

He also mentioned that he took the plug out of the cleanout at the grey house so sewage may be flowing out of it when they use the water. He wanted to make sure that they could use the water in their house so don't plug it up until it is fixed. May have to disinfect the area with Clorox.

Thanks
